

## Pyrostrip 500P and 500PSS Graphite

Pyrostrip 500P and 500PSS graphite seals are extremely effective in a wide variety of applications, including door edges, glazing in steel and timber partitions, pipe closure devices, air transfer grilles, aviation bulkheads and linear gaps.

In a situation where fire arises, the intumescent expands to many times its original volume and develops a positive pressure when restricted by two substrates. Because of its chemical composition, it also has a very high melting point.

### Features and Benefits

- Proven performance in numerous internationally recognised tests
- Suitable for both 30 and 60 minute fire resistant doors
- Choice of standard colours – white, light brown, dark brown, slate and black. Non-standard colours available on request
- Standard length – 2100mm. Non-standard lengths up to 3m available on request
- Smoke seal in black brush pile with options for flexible rubber in our Flexifin range
- Supplied with Self Adhesive tape (SA) as standard

# Pyrostrip 500P and 500PSS Graphite
